Experience

Technical Lead — UI / Frontend

Current · Present

The Smart Cube / WNS · Noida, India

Leads UI and frontend delivery for enterprise product surfaces, balancing hands-on implementation with architecture, reviews, collaboration, and team guidance.

- Shaped frontend approaches for dense monitoring, procurement, and analytics workflows
- Guided reusable component, widget, and design-system patterns across product screens
- Collaborated across design, backend, QA, and BA to clarify requirements and edge cases before build
- Reviewed for consistency, accessibility, maintainability, and release readiness

React · TypeScript · JavaScript · Next.js · Bootstrap · REST APIs · amCharts

Selected projects

SmartRisk — Risk Intelligence Platform

Technical Lead — UI / Frontend

Risk-intelligence product UI focused on navigation, reusable dashboard modules, and clearer paths from signal to action.

- Improved structure for complex risk information workflows
- Strengthened reusable dashboard and component patterns

React · TypeScript · JavaScript · Bootstrap · REST APIs

Amplifi PRO — Procurement Intelligence Platform

Technical Lead — UI / Frontend

Modern React interfaces introduced into an established enterprise procurement-intelligence product.

- Supported richer workflows and configurable dashboards during modernization
- Improved maintainability of UI modules in a mixed legacy/modern environment

React · TypeScript · JavaScript · Bootstrap · REST APIs

Enterprise Analytics Dashboard

Technical Lead — UI / Frontend

Configurable analytics dashboard with reusable widgets, filtering, search, pagination, and nested layout behavior.

- Defined composition-friendly widget and state boundaries
- Addressed nested layout, visualization, and edge-case behavior

React · TypeScript · JavaScript · GridStack · amCharts · REST APIs

UI Component Library & Design System

Technical Lead — UI / Frontend

Shared frontend foundation for consistency, token alignment, Bootstrap modernization, and multi-team delivery.

- Reduced incentive to reinvent common UI patterns
- Encoded accessibility defaults into shared components where possible

React · TypeScript · JavaScript · Bootstrap · CSS
